SUPER PINK is a highly concentrated powder that is formulated for use in car and truck wash systems. It can also be used as a multipurpose cleaner to clean virtually any nonporous hard surface not harmed by water alone, including oil rig platforms and commercial and industrial equipment and parts. Whether pressure spray, concentrated injection system or manual application is used, its high sudsing active ingredients will efficiently remove dirt and grime and facilitate the rinsing process. With proper application, this product will not harm aluminum or paint or etch glass.

### **APPLICATION**

For pressure spray systems, add 1-5 pounds of this product per 100 gallons of water in the solution tank of the washer. For concentrated injection systems, saturate the holding tank until satisfactory results are obtained. For manual washing, add ½ to 1 oz. per gallon of water. Apply solution with soft brush, cloth or sponge using circular motions. The amounts will vary based on water hardness, temperature and pressure and on the job at hand.

Note: Do not allow solution to dry on the surface being cleaned. For cars and trucks, rinse solution shortly after the application before the product dries on the surface. Rinse thoroughly with clean water and wipe dry with towel. Do not wash in direct sunlight.
