PEARL SUDS may be used to clean all dishware, pots & pans, silverware, crystal and glassware, floors, walls, equipment and parts, and virtually any hard surface not harmed by water. It is pH-controlled and contains emulsifiers, wetting agents and degreasers. It is formulated to be tough on grease and grime. This product is used in schools, nursing homes, municipalities, hotels, restaurants, and commercial and industrial arenas.

APPLICATION: Before use, food products and packaging materials must be removed from the room or carefully protected. After use, all food contact surfaces (including dishware and food-cutting and processing surfaces) must be thoroughly rinsed with potable water.

Use 1/8 to 1/2 cup per gallon of warm water, depending on the severity of soil and grease to be cleaned. Dissolve well in water, apply as fit and rinse thoroughly. Although pH-controlled, use impervious gloves to prevent drying of skin.

Keep only in original container in a cool, dry place away from direct sunlight, heat and moisture. Keep liner and top tightly closed. Do not breathe dust. Avoid release of the concentrated product to the environment. Use up completely. Recycle empty containers or dispose to an approved waste disposal plant.
