ATTRACT Dust Mop Treatment is an oil-based mop head treatment. It is formulated to contain special ingredients which, in a magnetic type action, attract and pick up dust particles.

ATTRACT quickly saturates a dust mop but evaporates slowly. It improves the effectiveness of the mop to collect dust and does not dim the floor luster. ATTRACT may also be used as a dust cloth treatment for small jobs. It leaves floors and surfaces free of dust, lint and hair, restores wood surfaces and leaves other surfaces shiny.

APPLICATION: Excessive use will result in slippery surfaces. Do not use excessive amounts on contact surfaces, especially on floors, where slipperiness may be hazardous. Wash mop heads or dust cloths with a quality laundry detergent. Then either soak them in this product and hang them to drip for several hours before use or spray them lightly with this product immediately before use. Do not overuse. Test surfaces for slipperiness after use. If slippery, simply wipe off excess with a dry, untreated mop or dust cloth.
