Highly Active, All-In-One Fabric Cleaner
One-Step Cleaning: For Most Cases, No Need For
Other Detergents, Bleach, Boosters, Breaks
or even Cuff & Collar Pretreatment
***Biodegradable *Multipurpose / Multiusos**

This product is a special low-sudsing, multipurpose formula which cleans and brightens fabrics in hot or cold water. It is designed for use in commercial washing machines. In addition, it can be used to clean floors, decks, walls, ceilings and hard surfaces.

APPLICATION: Add product to water. Do not apply the concentrated product directly to fabric as this may permanently damage that area. For light loads, use 1/8 to 1/2 cup per load. For larger loads or commercial washing machines, use 1/2 to 1 cup per load. Use slightly more for hard water conditions. For cleaning hard surfaces, use 1/2 to 1 cup per 5 gallons of water. Optimum wash temperature for this product is 140°F.

NOTE: Normally, do not use hot water on the first cycle. The water temperature should be below 120°F. Hot water will set (bake) the stains which will become hard to remove.

Este producto es una formula especial multiusos de poca espuma que limpia y aclara telas en agua fria o caliente. Está diseñado para ser utilizado en lavadoras comerciales. Además, puede ser utilizado para limpiar suelos, cubiertas, paredes, techos y superficies duras.

APLICACION: Añadir producto al agua. No aplique el producto concentrado directamente a la tela pues esto puede dañar permanentemente la zona. Para cantidades livianas, use de 1/8 a 1/2 de taza por lavada. Para cantidades grandes o maquinas comerciales, use de 1/2 a 1 taza por lavada. Use un poco mas para condiciones de agua dura. Para limpiar superficies duras, use de 1/2 a 1 taza por cada 5 galones de agua. La temperatura óptima para este producto es 140°F.

NOTA: Normalmente, no use agua caliente en el primer ciclo del lavado. La temperatura del agua debe ser menos de 120°F. Agua caliente fijara (endurecerá) las manchas y serán más difíciles de remover.
